PROFESSIONAL SUMMARY

Final-year Computer Science student specializing in cybersecurity, with hands-on experience building SOC platforms, IDS systems, and security automation tools. Skilled in threat detection, incident response, and defensive engineering. Seeking a Security Analyst role to secure systems and automate threat mitigation.

TECHNICAL SKILLS

- **Security Domains:** Security Operations (SOC), Incident Response, Threat Hunting, Vulnerability Management, Digital Forensics.
- **Network Defense:** Intrusion Detection (Suricata, Snort), Traffic Analysis (Wireshark), OWASP Top 10, Cryptography.
- **Languages & Scripting:** Python (Security Automation), Bash, Go, TypeScript, Java.
- **Tools & Platforms:** SIEM (Splunk / ELK), Linux (Kali), Docker, Git, Burp Suite, Nmap.

HANDS-ON SECURITY EXPERIENCE

docksmith | Custom Container Runtime | Go

- Engineered a lightweight container runtime from scratch in Go, successfully replicating core Docker operations (build, run, rmi) without relying on high-level orchestration tools.
- Architected strict **process isolation** utilizing low-level Linux primitives (Namespaces, cgroups, `chroot`), implementing robust filesystem isolation and PID namespace separation.
- Developed deep expertise in container architecture and system-level security, directly translating to the ability to identify and mitigate container breakout and privilege escalation vulnerabilities in cloud environments.

CyberSentinel | Security Operations Center (SOC) Platform | Python, REST APIs

- Engineered a high-fidelity SOC platform designed for real-time threat monitoring, ingesting and parsing continuous streams of security log data (handling simulated loads of 500+ events/sec).
- Implemented automated event aggregation and rule-based alert correlation, successfully **reducing alert fatigue by ~35%** and saving an estimated 10+ hours per week in manual log review.
- Transformed raw, fragmented datasets into a centralized, actionable dashboard, enabling rapid incident response and confident decision-making for analysts.

Host-Based Intrusion Detection System (IDS) | Python, Suricata

- Deployed a custom host-based IDS leveraging Suricata to monitor network traffic, configuring **50+ custom detection rules** targeting high-risk web application attacks.
- Achieved **90%+ detection accuracy** for SQLi and XSS payloads across a test dataset of 10,000+ network packets during controlled lab testing.
- Provided a robust, automated defensive layer that immediately flags Indicators of Compromise (IOCs) before exploitation can occur.

Automated Vulnerability Scanner | Python, DVWA

- Developed an automated Python scanner to audit web architectures, cutting manual enumeration time by ~50%.
- Proactively identified input validation flaws and misconfigurations across deliberately vulnerable environments (DVWA), adopting an attacker's mindset to strengthen enterprise hardening strategies.

TrustOS | Deepfake & Threat Detection | TypeScript

- Built a digital forensics application designed to analyze media files, detect digital forgery, and neutralize media threats.
- Applied advanced threat intelligence methodologies by verifying data authenticity and mimicking real-world evidence-handling protocols.

SECURITY RESEARCH & LAB REPORTS

- **Network Infiltration & IDS Bypass:** Researched and documented techniques for bypassing advanced IDS using packet fragmentation and timing-based obfuscation.
- **Web Architecture Exploitation:** Authored detailed security audits of web architectures based on the OWASP Top 10, mapping vulnerabilities directly to mitigation strategies.

CERTIFICATIONS

- **Ethical Hacker** – Cisco Networking Academy (2026)
- **Introduction to Penetration Testing** – Security Blue Team (2026)
- **Cybersecurity Course** – Tech Mahindra Foundation / Skill India (2026)
- *(Note: Actively preparing for industry-standard certifications [e.g., eJPT / Security+] to further validate practical penetration testing and defense skills).*

EDUCATION

Bachelor of Engineering – Computer Science Engineering *PES University, Karnataka* | 2023 – 2027
